Chez moi until about 3 PM; two hours at least & spent sorting through all the PN proper and establishing a PNI pile & also piles for WSP, HLRP, WWP, JRP, DWP, SRP, & RTP. once those categories are established -- and I believe they now are -- I can arrange in order the thousands of pages that will make up PN2. At the same time, there are a great many additions & corrections that have to be made to PNI, and I will make them.

Jean called and said that on Friday, no Saturday, January 21, a Colville delegation (Chuck, Mark, Ken, Jean & perhaps others) will come over & we will drink a toast to the house -- it will be the farewell to the house as Mr. Hendrick & others knew it. What a melancholy moment that will be. During the week following the 21st, the house (SHL) will be picked over/raped by members of the Colville family. What a melancholy moment that will be.

City Hall — 3-10 PM.

Met Ray there at 3 & he began plastering the ceiling in 302; Paul & Jimmy arrived around 3:30 PM & they began doing more sanding on the door to 302; Ed Morehead & Jimmy assisted me caulk & glaze & reinforce with metal corner braces four more windows on the 3rd floor. Paul helped me take out of the window openings the 4 windows in question -- the west window in 305 & the western-most window on the north side of 305. Both windows were very much in need of re-glazing & painting. The glass in both pairs of windows was precariously close to falling out. at any rate, I re-glazed & reinforced & painted 4 more windows today & that makes me feel very good. It took about six hours for the whole process -- removal, scraping, reinforcement, re-glazing & painting. Ray plastered the ceiling in 302. Jon arrived
